March 22:
Sun's position in relation to Equator

"On the 3rd day" after the Spring Equinox, the sun breaks past the Equator, and thus fully emerges from its "Tomb" of the Southern Hemisphere. This symbolically represents **Lucifer, The Light Bringer,** "rising from the dead," to begin his journey toward his highest power at the Summer Solstice.
Lucifer = Lux (Light) + Ferre (To Bring). These high and low points of "Light" may also be seen in the Cryptic Tracing Board Of Tubal Cain, shown below.

The Sun's Zodiacal trek may clearly be seen in the Masonic 1st Degree Tracing Board, when viewing the board on its side.

March 22:
"Lucifer Is Risen"

The Third Degree Tracing Board (above) shows the Skull and Bones, and warns us about the three murderers of Hiram Abif: Ignorance, Apathy, and Cowardice. We must always be on guard against these three insidious destroyers of Spiritual Awareness.

Clandestine Lodge 322; Order Of Skull And Bones (Order Of Death). their Yale University-based order is headquartered at the location known as "The Tomb."

Lent as "a time to make a sacrifice" is merely a proxy. This is the real "season of sacrifice."

In Pagan Sun-worshipping traditions, animal (and sometimes human) sacrifices were offered during the 40 days between the Spring Equinox and May Day (mid-spring). This is the planting season, and the sacrifices were made to the Sun and the Earth to ensure a bountiful harvest.

40 Days

The 40 Days between March 22 and May 1 (May Day)are the "Season Of Sacrifice." Be particularly vigilant for "false flag" events, and potential "human sacrifice" rituals during this time. "40 Days" is a significant symbolic time period, in biblical and occult terms.
